1 - 6 of 6 Records

"Entered" means document uploaded to case and reviewed by a DTA worker.

How to find out if DTA looked at client's documents:

First, ask the DTA worker to pull up the "Scanned Document History Tab" in BEACON. Second, ask her to look for any documents not processed (coded as "available.") Third, if the document is already "entered", ask worker to look again at the documents to be sure they handled properly. There are often mistakes.
